

The Billi story

At Billi, we design and manufacture a range of energy efficient filtered water systems that offer our customers the very best in innovation, superior performance and reliability.

For more than 20 years, we have maintained a commitment to excellence and quality that is second to none. Our award winning filtered water systems are preferred by Australian designers and architects for their elegant styling and space saving design.

Billi launched the world's first underbench boiling & chilled filtered water system in the early 1990s and was instantly recognised as the premium product of choice because of its high functionality, energy efficiency and space-saving design. From that first product, our range has grown to include a full complement of commercial and domestic systems now available throughout the world.

Today, we continue to innovate. Our designs keep pace with modern building techniques, contemporary interior concepts and changing lifestyle choices. And importantly, all our products continue to incorporate improved eco-technology features.

From design to manufacture, distribution and installation, every Billi water system is created to last. We offer premium after sales assistance and product support, ensuring that our valued relationship with our customers doesn't end at purchase.

Billi is fully Australian-owned and all Billi products are Australian-made.

Billi's environmental focus

There is no need to compromise your lifestyle to reduce your carbon footprint. Billi is renowned for its eco focus, ensuring our sustainable appliances go beyond water and energy saving. We aim for low environmental impact and to enhance the enjoyment of your personal surroundings.

A total quality commitment makes a Billi system Australia's first choice in water appliances – sleek looks combined with impressive performance.

Billi™

Now you can have boiling and chilled filtered drinking water on tap

Designed with you in mind. The Billi Home range provides you with the ultimate in drinking water appliances. Imagine the convenience of an instant supply of refreshing clean filtered water – boiling and chilled.

Safety switch. All our Boiling and Chilled dispensers come with an integrated safety switch. The red lock icon demonstrates when the safety switch is activated, simply press the switch to release the lock and allow full use of boiling water. The system will revert to safety mode after 8 seconds of non use.

Splash free delivery. Electronic control of boiling water delivery ensures user safety. The flow is momentarily slowed as the water exits the dispenser, eliminating splashing as the water enters the cup.

Recovering, recycling and saving. All Billi Boiling and Chilled systems utilise the patented Billi Thermodynamic Heat Exchange technology. A technological breakthrough in energy efficient appliance design, this process uses change of state technology to allow a large amount of heat to be absorbed and stored. Typically this heat generated during the cooling process is wasted to the atmosphere. Billi recovers this waste heat energy to preheat the boiling water, enabling our systems to achieve substantial energy savings.

7 day time switch. All Quadra systems have an inbuilt 24 hour, 7 day time switch which ensures the unit is running only when needed and eliminating unnecessary out-of-hours power consumption.

Stand-by mode. All Quadra systems also include an energy saving standby mode that can be selected to activate after a preset time of non use, enabling partial power down to conserve power.

Eco intelligence. Our Eco systems incorporate new software technology that automatically allows the unit to only operate when required. The technology monitors daily usage patterns, even recognising evening and weekend changes, which means very effective minimization of energy consumption.

Space saving. With a design focus on space saving our Boiling and Chilled systems are often half the size of comparative underbench products, allowing you to make the most of the

available area. The Eco sets a new standard for space saving at an amazing 180mm wide.

No cupboard ventilation. No cupboard ventilation grilles or fans are required for our standard Quadra water cooled range or the Eco. This leaves your kitchen cabinets looking much cleaner and also allows for easier and simpler installation.

Automatic boiling water calibration. Because boiling point varies by altitude, Billi systems identify the boiling point during the start up mode and sets the temperature accordingly to ensure your boiling water is as close to boiling point as possible.

Adjustable chilled water. The Chilled water temperature can be adjusted between 6 and 15 degrees Celsius to suit the application and users taste.

Premium filtration. Billi's premium filters ensure that health threatening pollutants and impurities such as sediment, chemicals, heavy metals and pesticides are removed leaving you with refreshingly clean drinking water, every time. Our filter cartridges are exceptionally easy to change and can be ordered online or through your local approved supplier.

Specifications

Instant Boiling and Chilled Filtered Water System

Product Code	Model	Initial cup delivery & suggested no. of persons	Boiling water delivery cups per hour	Chilled water delivery cups per hour	Ambient water cups per hour	Total current draw amps	Height mm	Width mm	Dept mm
901000	Eco XL	10	90	60		10	340	180	500
904010	Quadra Compact XL	20	100	150		10	340	315	365
904060	Quadra 460 XL	60	180	175		10	340	315	465
943010	Sahara 310 XL	10	90		Unlimited	10	340	180	360
932120	Alpine 120 RS*	20		120		10	340	180	460

* Dispenser Type XL Levered except for Alpine 120 with Round Slimline

Levered dispenser option

The levered dispenser is streamlined and elegant. It is simply operated with position-sensitive levers.

Integrated font option

The new integrated flush mount font is the perfect addition to the new tap creating the ultimate in modern, clean styling.
